Interdepartmental Undergraduate Program for Neuroscience

DIRECTED RESEARCH 199C INFORMATION
FOR SPONSORING FACULTY

The purpose of a Continued Directed Research course in Neuroscience is to provide the opportunity for students to continue to integrate theoretical concepts with practical implementation in a special area of interest, and to develop the skills and knowledge essential for independent inquiry.

Neuroscience students who have completed NS 199AB (or NS 198AB) may continue taking upper division research with their faculty mentor. NS 199B or 198B is an enforced prerequisite to NS 199C.

In an effort to maximize and maintain the quality of Neuroscience 199s, we ask that you review the following information, sign the form, and return it (or have the enrolling student return it) to the Neuroscience Advising Office. *A copy of this form can be provided for your records upon request.*

I, _____, am a faculty member at UCLA, and agree to sponsor
_____ for a Neuroscience 199C for the _____ quarter.

In so agreeing, I commit to actively supervise this student's project to assure that the student's efforts are of good quality, and that the student receives the necessary assistance required to understand each stage of the research.

I am aware that the student has contracted to spend, on average, a minimum of twelve hours per week in the lab. While there is flexibility in how the student accumulates the requisite hours, some oversight will be provided to be sure the student takes this commitment seriously.

By Friday of Finals Week, the student is required to submit a research paper, and a copy, signed by the faculty sponsor, must be turned in to the Neuroscience Undergraduate Advisor. Students have been advised to turn in their papers to their sponsoring faculty first, and with plenty of time for review in the case revisions are required.

Guidelines for the paper are as follows:

3rd quarter 199: a complete research paper in standard scientific format, in consultation with faculty sponsor (text must be a minimum of 5 pages).

While it may be the case that more than one student is working in my lab on the same or related projects, the student's paper will be an independently drafted document.
